1. We used CDN for the Bootstrap framework, so you do not need to install any packages and libraries to run the project.

2. Unzip the QuickCart.zip

—---------------

The first way to run the product (easiest):

1. Open the "QuickCart" folder

2. Look for the "home.html" file and open it by double-clicking it.

3. The project should open on your default browser.

—---------------

The other method to run the product is by using the VS Code source code editor:

1. Install VS Code at https://code.visualstudio.com/download

2. Open up VS Code

3. Navigate to the extensions and install "Live Server"

4. Open the "QuickCart" folder in VS Code

5. On the left side of VS Code, right-click on the "home.html" file and select "Open with Live Server"

6. The project should open on your default browser.
